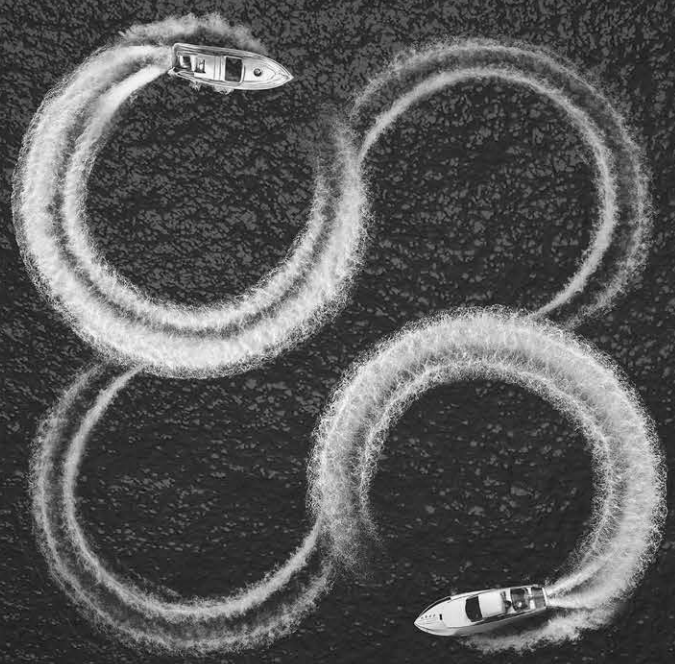
OUR STORY

Crafting the Future through Italian Excellence Our Shape, Your Journey!

Founded in 2001 in one of Italy's most renowned regions for steering wheel production, our parent company **Moulding Tech** began by specializing in polyurethane steering wheels with premium leather wrapping. In 2008, we took a significant step forward with plastic injection moulding, gaining a competitive advantage and establishing a presence in the automotive sector.

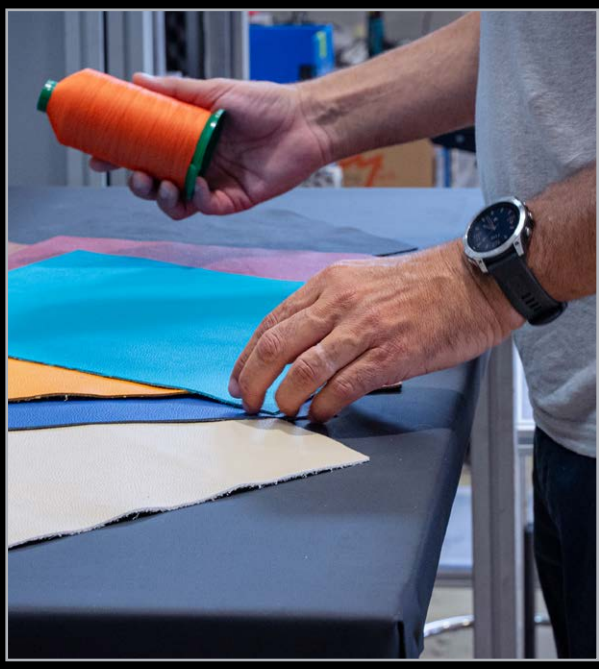


Over time, we enriched our capabilities with integrated services such as pad printing, screen printing, painting, and laser etching. These additions allowed us to deliver not just products, but complete, customizable solutions that set us apart from competitors. As part of our growth journey, we expanded into the boating industry, initially as subcontractors for leading global players. Between 2015 and 2023, we partnered with major suppliers and retailers, strengthening both our reputation and our market presence.

Today, with **Castelli Italia**, we bring this experience directly to the boating and recreational industry. We combine consolidated know-how, Italian design, and a highly innovative technical department capable of managing every stage of production internally. Our mission is to provide not just steering wheels and components, but complete solutions — crafted with care, driven by innovation, and fueled by a passion for excellence.

Join us on this journey of Italian craftsmanship and innovation.

W E A R E



Design based excellence

At CASTELLI ITALIA, we don’t just create products, we craft experiences. Every steering wheel we produce is the result of a design-driven process that blends the Italian craftsmanship with continuous **functional and aesthetic research.** Whether navigating open waters or tackling rugged terrain, our wheels elevate your journey, transforming movement into an **immersive, thrilling experience.**

THE ART OF CRAFTMANSHIP

Our steering wheels are designed to **establish an immediate connection** with the user, infusing each journey with **purpose, precision, and emotion.** The thrill of exploration merges seamlessly with the **comfort of artisanal construction**, guiding each motion with **elegance and intention.**

At **CASTELLI ITALIA**, we redefine excellence. Our precision-crafted steering wheels empower designers and engineers to reimagine this critical component, enhancing both form and function under the esteemed banner of Made in Italy.

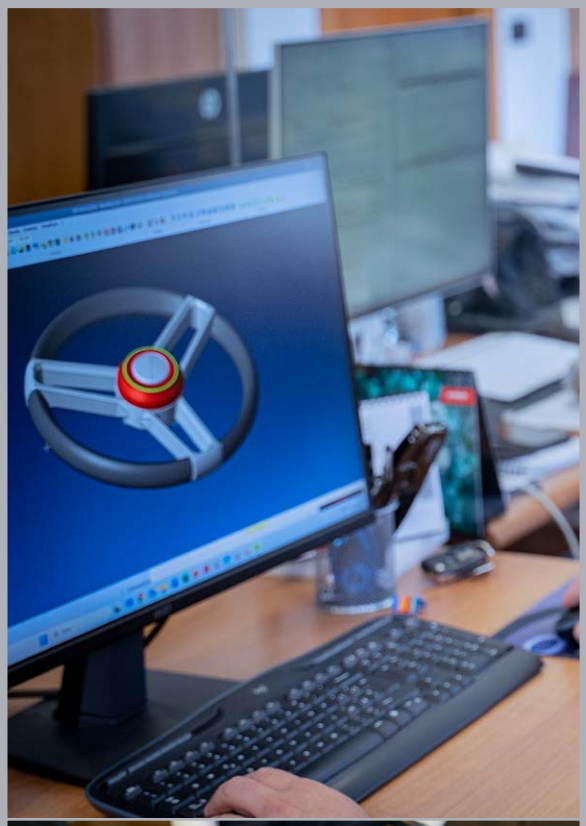
OUR COMMITMENT

Born from twenty years of Moulding-Tech's expertise in the automotive sector, Castelli Italia embodies a brand where continuous research, innovative design, **know-how** and **certified quality** are the cornerstone values of every product.

Rooted in Italian craftsmanship and driven by innovation, Castelli Italia partners with manufacturers to co-design sustainable, high-performance steering solutions. We are committed to exceeding expectations, creating long-term value for our clients and their customers, while honoring the legacy of design excellence.

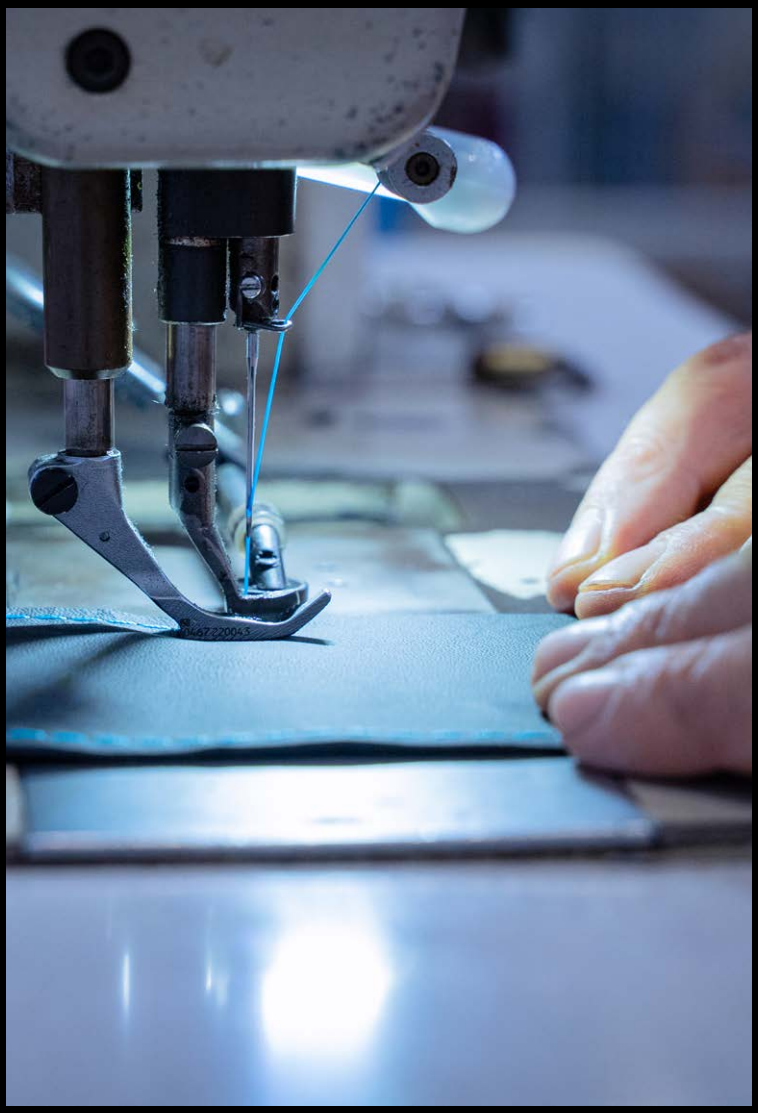
THE PROCESS

The production of nautical steering wheels at Castelli Italia brings together traditional craftsmanship and **advanced engineering.** Our in-house capabilities cover nearly the entire supply chain. With an **experienced technical team and our own tool shop for tool design and machining**, we oversee every stage of the process.



Process integration allows us to remain flexible, responsive, and consistent in delivering premium quality: **we develop our ideas through our design and technical department, tool shop, injection moulding, in-house painting, pad printing, laser etching, foaming injection and leather wrapping.**

We believe every customer should be part of the process. **Each steering wheel can be fully customized, from the choice of leather and stitching to the addition of a bespoke logo.**



QUALITY MADE IN ITALY

Italy is renowned around the world for its ability to blend craftsmanship, design, and innovation into products that are not only functional but also emotionally resonant.

At Castelli Italia, we carry forward this legacy by combining generations of expertise, an eye for timeless aesthetics, and an obsessive attention to detail. Every curve, every stitch, every material is chosen and crafted with care, because for us, quality is not just a standard, it's a culture. This is the essence of Made in Italy: a symbol of authenticity, beauty, and excellence that continues to inspire trust and admiration across industries and continents.

OUR COMMITMENT TO A SUSTAINABLE FUTURE

Located in an area traditionally known for its expertise in the production of steering wheels, our parent company Moulding Tech is dedicated to producing high-quality products while preserving the beauty and health of our environment. Our commitment to sustainability is at the core of everything we do. Moulding Tech's approach has been centered on expanding its use of renewable energy, aiming at a substantial reduction of greenhouse gas emissions in addition to focusing both on enhancing energy efficiency across all its operations and on reducing waste by improving resource utilization. Our commitment to sustainability and ethical practices is deeply rooted in Moulding Tech's operations.
